

HELIUS MEDIASTREAM SST-Ni

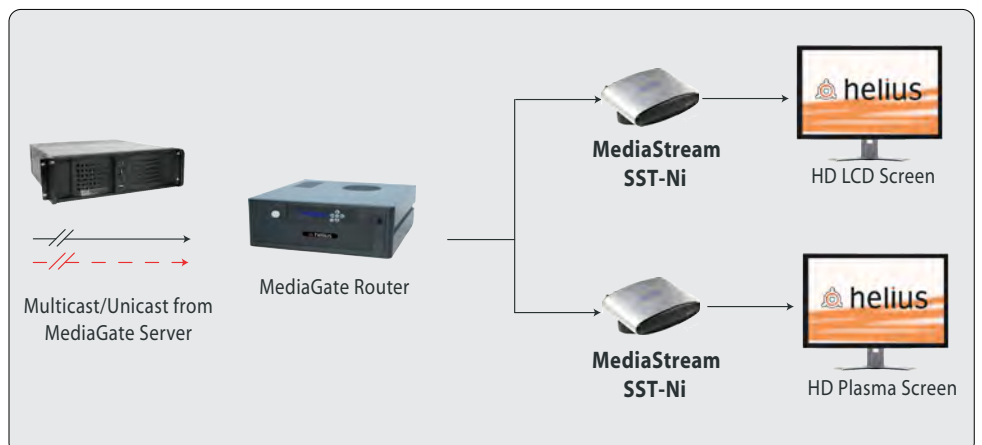

THE HELIUS MEDIASTREAM SST-Ni IS A FULLY MANAGED PLAYER, PROVIDING PLAYBACK OF CENTRALLY CONTROLLED VIDEO

HELIUS MEDIASTREAM SST-Ni OVERVIEW

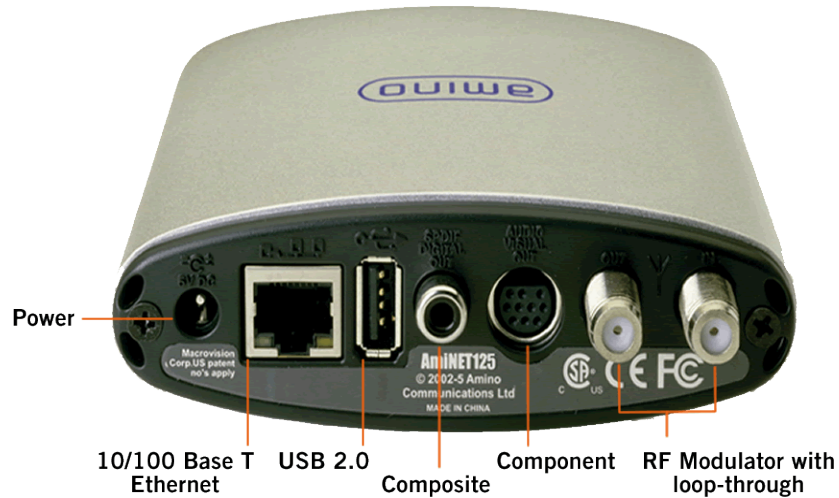

The Helius MediaStream™ SST-Ni is a low-cost high definition MPEG-2/MPEG-4 playback device, utilizing the power and reliability of the Amino A125 platform*. When coupled with the Helius MediaGate Router, the SST-Ni provides playback of centrally controlled video. The simplicity of the SST-Ni playback device together with the robust features of the MediaGate Router provides a complete video management and playback solution that meets the needs of many enterprise customers.

By combining the Helius MediaStream SST-Ni with the Helius MediaGate Router, all end-user interaction is minimized, reducing local management of the playback device. The content is centrally managed and deployed to ensure that appropriate programming is available without requiring local intervention. Multiple video feeds can be managed by the MediaGate Router and subsequently multicasted to the SST-Ni(s) over ethernet. By combining the power and flexibility of the open standards based Helius solution, customers can integrate these technologies into their existing networks without replacing or reconfiguring existing network infrastructures.

*Trademarks of Amino Technologies plc.

> TECHNICAL SPECIFICATIONS

HARDWARE

Outputs:

- Composite, Component, RGB, S-Video, SCART
- SD PAL or NTSC
- RF Modulator with loop-through
- Stereo & Digital Audio S/P - DIF (Electrical)
- USB 2.0

Inputs:

- Ethernet 10/100 Base T

Form Factor:

- Height: 35 mm
- Width: 100 mm
- Depth: 114 mm
- One-piece Aluminum Extrusion

SOFTWARE

- Teletext/closed caption decoding and subtitling
- Centralized Control
- Scalable
- Multicast and VoD
- Remote management and administration
- Day Parting
- Proof of Payout Reporting
- MPEG4/MPEG2/Flash/jpg/gif/png support

> HELIUS SOLUTION

The Helius MediaStream™ SST-Ni gives enterprise customers a tool they can use to deliver high quality video content in a cost effective way. By combining the Helius MediaStream SST-Ni with the Helius MediaGate Router, the organization can centrally control and playback video. The simplicity of the SST-Ni virtually eliminates the end-user management of the playback device, allowing for focus on the content being delivered.
